Задание 3

The screenshot displays a web browser window with a login form. The form includes fields for "E-mail" and "Пароль" (Password), a checkbox for "Запомнить меня" (Remember me), and a "Войти" (Login) button. Below the button, there is a link: "Забыли пароль? Не получили письмо для активации?".

The browser's developer tools are open, showing the "Elements" panel on the left and the "Network" panel on the right. The "Elements" panel shows the HTML structure of the login form, including the input fields and the login button. The "Network" panel shows a list of network requests, with the "login" request selected. The "Headers" tab for the "login" request is open, showing the request headers, including "Content-Type" (application/x-www-form-urlencoded) and "User-Agent" (Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/91.0.4472.164 Safari/537.36).
